EXPERIENCE

ProNetworks

Santa Ana, CA

Web Developer

January 2024 - March 2025

- **Designed and maintained a web-based inventory management system**, implementing data validation and automated checks to ensure accuracy in tracking hardware.
- **Implemented responsive UI features and enhanced front-end functionality** using modern web technologies to improve user engagement and system usability.
- **Integrated Firebase as the backend database for the inventory management system**, enabling real-time data synchronization and secure user authentication.

ProNetworks

Inventory Associate

Dec 2022 – January 2024

- Managed **product listings** on eBay, optimizing descriptions, pricing, and customer communication, increasing sales by **50%**.
- Retrieved, packaged, and shipped inventory items, ensuring **accurate order fulfillment**.
- Assisted in **inventory organization and tracking**, maintaining accurate stock records.

The Coder School

Yorba Linda, CA

Tutor

February 2022 – January 2023

- **Designed and delivered weekly coding lessons**, enhancing students' ability to **problem-solve like programmers** through hands-on exercises.
- **Provided one-on-one coaching**, leading to an **improvement** in Python proficiency among students
- **Taught and guided students** in programming languages including **Scratch, Python, HTML/CSS, and JavaScript**, managing a class of up to **6 students**

PROJECTS

Inventory System | React, Vite, Javascript, Firebase

- **Designed and implemented** a custom **inventory management system** that increased warehouse operational efficiency by reducing retrieval and packaging times.
- **Built a professional, customer-facing interface**, allowing clients to **browse inventory and submit inquiries**, streamlining the sales process.
- **Integrated Firebase for real-time data storage and authentication**, ensuring **99.9% uptime** while securely managing **20,000+ inventory records**.

Cisco Device Testing Automation Scripts | Python

- **Developed Python scripts to automate testing and diagnostics** for Cisco machines, reducing manual testing time by **50%**.
- **Implemented automated logging and report generation**, capturing **detailed test results** to ensure hardware operational readiness.
- **Created a user-friendly manual** to standardize test execution, allowing non-technical team members to efficiently run diagnostics.

SKILLS

Programming: Python, JavaScript (ES6+), TypeScript, C++, HTML/CSS, SQL, PowerShell

Frameworks & Databases: React, Next.js, Vite, Tailwind CSS, Firebase, PostgreSQL

Software: Visual Studio Code, Git, Github

Soft skills: Agile / Scrum, Leadership, Problem Solving, Time Management, Bilingual (Vietnamese)

EDUCATION

California State University, Fullerton

2019-2024

Bachelor of Science, Computer Science
