EXPERIENCE

Coding Minds Irvine, CA
Coding Instructor *April 2025 – Current*

- **Deliver one-on-one coding instruction** to K–12 students, tailoring lessons to individual learning styles and skill levels.
- Teach programming fundamentals and problem-solving using **Python** and **Scratch** to build a strong foundation in computer science.
- Introduce students to **mobile app development with Flutter**, incorporating **OpenAI APIs** to build AI-enhanced applications.

ProNetworks Santa Ana, CA
Software Engineer (Contract) *January 2024 - March 2025*

- **Designed and maintained a web-based inventory management system**, implementing data validation and automated checks to ensure accuracy in tracking hardware.
- **Implemented real-time synchronization** between the client and Firebase backend by integrating **Firestore and Authentication APIs,** ensuring accurate inventory tracking and secure user access.
- **Collaborated** with staff to gather feedback on **system usability and iteratively improved features,** resulting in a more intuitive and efficient inventory workflow.

The Coder School
Code Coach February 2022 - *January 2023*

- **Mentored 10+ students weekly** in building custom software projects using **Python, JavaScript, and Scratch**, fostering a deep understanding of algorithmic logic and clean code principles.
- **Facilitated full-stack web development training** by guiding students through the creation of interactive websites, emphasizing the integration of **HTML structure, CSS styling, and JavaScript logic**
- **Adapted technical instruction for varying skill levels,** managing a rotating roster of students and ensuring consistent progress through diverse languages including Scratch and Python.

PROJECTS

Inventory System | React, Vite, JavaScript, Firebase

- **Designed and implemented** a custom **inventory management system** that increased warehouse operational efficiency by reducing retrieval and packaging times.
- **Built a professional, customer-facing interface**, allowing clients to **browse inventory and submit inquiries**, streamlining the sales process.
- **Integrated Firebase for real-time data storage and authentication**, ensuring **99.9% uptime** while securely managing **20,000+ inventory records**.

HotCue Sounds E-Commerce | Next.js, TypeScript, Shopify API, GraphQL, AWS (CDK, Lambda, S3, CloudFront)

- **Built a modern e-commerce platform** for DJs and producers to browse and purchase sound packs, samples, synths, FX, and MIDI packs, demonstrating full-stack development with headless CMS integration.
- **Integrated Shopify's headless storefront API** using **GraphQL** to manage product catalogs, shopping cart functionality, and checkout processes, enabling a decoupled architecture for enhanced flexibility.
- **Deployed application to AWS** using serverless architecture with **Lambda** for backend logic, **S3** for static asset hosting, and **CloudFront** for global content delivery

SKILLS

Programming: JavaScript, TypeScript, Python, C++, HTML/CSS, SQL
Frameworks & Databases: React, Next.js, Vite, Flutter, Tailwind CSS, Firebase, GraphQL, PostgreSQL
Tools & Software: VS Code, Git, Github, AWS (Lambda, S3, CloudFront, API Gateway, CDK), Android Studio
Soft skills: Agile / Scrum, Leadership, Problem Solving, Time Management, Bilingual (Vietnamese)

EDUCATION

California State University Fullerton **2019-2024**
Bachelor of Science, Computer Science
